

URBAN

PERFECT FOR URBAN GARDENING

Introducing the Juliana Urban series, perfect for urban gardening. Now you can grow hard to find vegetables and herbs right on your balcony or courtyard. With the Urban series you will have the option to pursue your gardening interests and

exercise your green fingers, even without a big garden. Juliana Urban is the perfect fit for your balcony, terrace, against the wall or in the city garden.

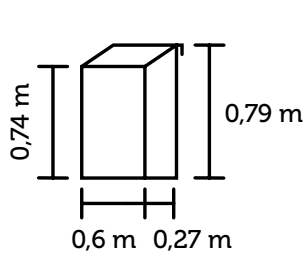

You can attach your Juliana Balcony on the rails of the balcony or mount it on the wall with the supplied brackets.

In Juliana Vertical you will have room for your plants and at the same time still have a small working space for you gardening tools. No matter where you put it, you will be able to pursue the experience of growing your own herbs and spices and finding joy at the same time.

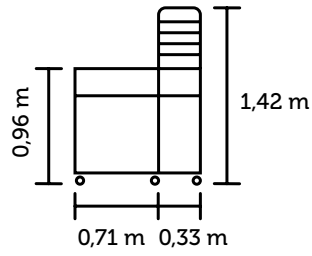

Two removable plant shelves allow you to take your herbs straight to the kitchen or dining table.
